- E:** (2) C-shape Block 8 x 12

### LINTEL (unlabeled)

---

- (1) Lintel

### FLAT CAP (unlabeled)

---

- (2) 46 x 21

### CAPS (unlabeled)

---

- (5) 14 x 12
- (2) 7 x 12 cut pieces

## PRODUCT USAGE / DISCLAIMER

---

This fireplace is designed to burn solid wood, plumbed propane or natural gas only. Gas log appliances must be approved for outdoor use. Please obtain the proper permits in your local jurisdiction and make sure to comply with all building codes. This fireplace is not designed to be used indoors or in any framed wooden structure. It should not be placed next to or on any combustible materials. Do not fill voids with insulation or any other materials. This fireplace is not intended to be used for cooking food. Belgard recommends using a grate centered in Burning Box for optimum burning performance. Do not stack wood against block walls while burning. Be aware that sparks can escape and ignite combustible surroundings. Do not over pack with wood.

# HELPFUL TIPS BEFORE YOU GET STARTED

- Have a tape measure handy at all times.
- Lay block left-to-right or back-to-front instead of outside-to-in. Laying block outside to in will make it difficult to place the inner blocks.
- When unloading the pallet, place the removed block at two to three feet from the pallet, leaving a clear path on all sides of the pallet. This will ensure easy access to the pallet at all times. **And if you want to make it extra easy on yourself, group alike blocks together for quick reference — A's together, B's together, etc.**
- Make sure the letters on each block face a connecting block so they are hidden.
- Once each course has been placed, make sure you tighten it up by using a rubber mallet on the edges.
- Please contact our customer service team for questions and installation support. Toll Free: 1-800-321-9141

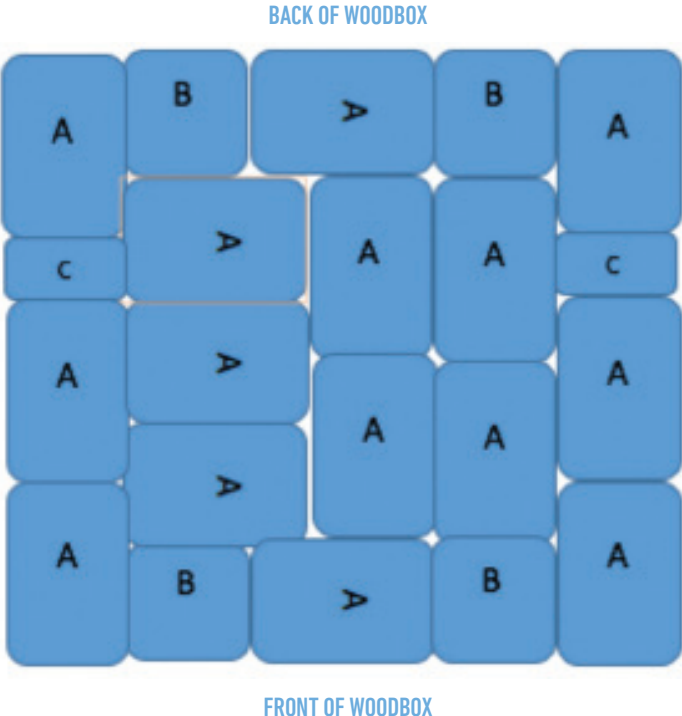

# COURSE 1

Lay full block units (A) as shown below. Square up your base so that it is 40 inches deep and 44 inches wide.

# COURSE 2

Lay on top of C1 and make sure it is square to the base.

# COURSE 3

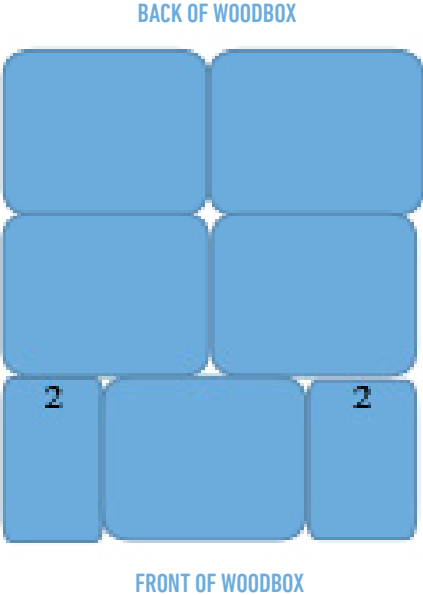

Lay block as shown below, starting in the top left corner (back left of base) making sure it is flush to the edges of the previous course.

# COURSE 3 (CAPS)

Once the Course 3 block is placed, the caps should be placed inside the block as shown below. This will allow you to tighten up the complete 3rd course (block and caps) to ensure a tight fit before moving on to the 4th Course. It is recommended to lay all block and caps to ensure proper placement before applying adhesive.

Follow the diagram below paying close attention to the various sizes of caps. Start by placing the caps in the back left corner, inside the "U". Once the caps have been placed, be sure to tighten up the all the edges of the block to remove any gaps / spaces in the caps inside the Course 3 Block.

# COURSE 4

# COURSE 5

Repeats Course 3

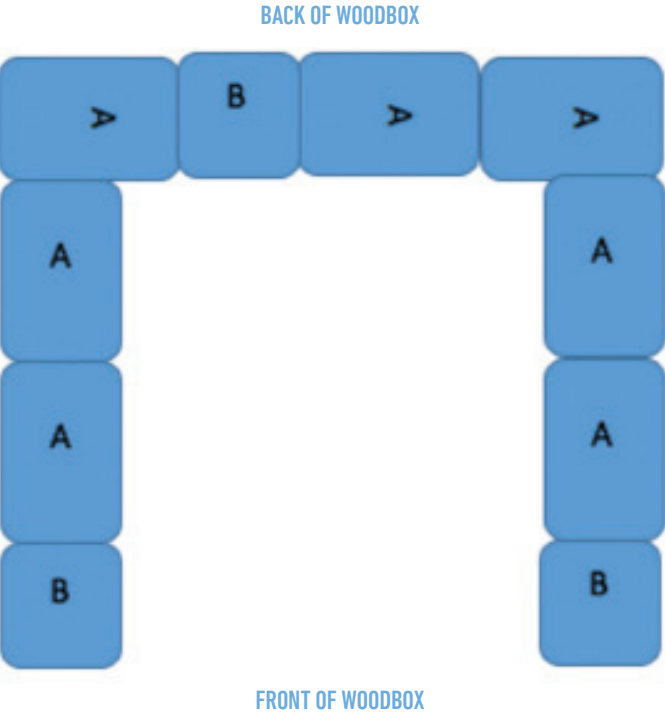

# COURSE 6

Repeats Course 4

# COURSE 7

Repeats Course 3

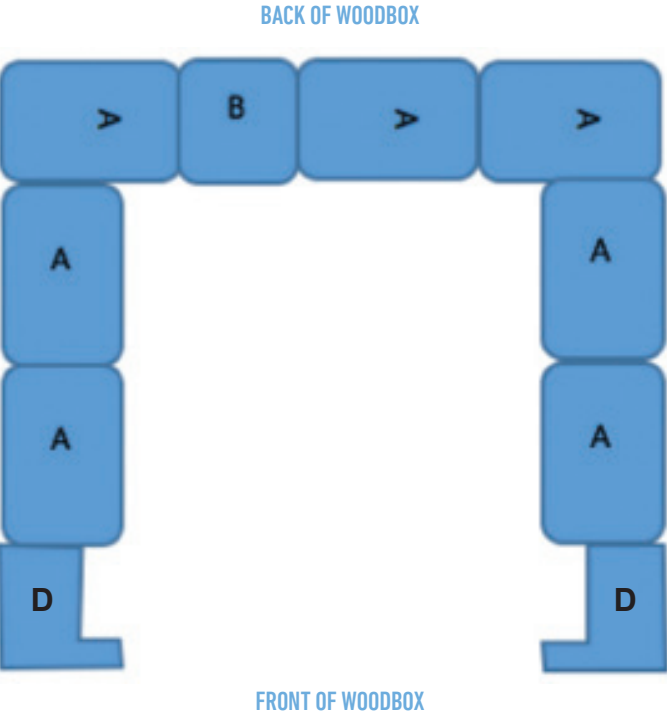

# COURSE 8

Repeats Course 4

# COURSE 9

# COURSE 10 (FINAL COURSE)

After laying the block in Course 10, insert the lintel into the grooves of the C-Shaped block (E) and then place the (2) 46 x 21 caps on top of the unit.

Congratulations! Enjoy your Belgard Woodbox!
