RESOURCES

Hardscapes for Easy Living™

Pavers add visual interest, function and substance to any outdoor landscape. They enhance both intimate and extravagant areas, complement traditional and modern aesthetics and serve small and large budgets. In this issue, Eagle Bay presents three distinct paver designs so you can easily choose a paver with the finish and pattern that best matches your unique style.

PAVERS

“When we were selecting pavers, we looked for a color and style that felt modern but also integrated into our natural landscape. Chatham Modern was the perfect choice.”

— MILLS FAMILY

Our single-piece designs include our most popular shaped pavers in a variety of textures and colors.

LEFT: CottageStone Textured, Blue Ridge & Chesapeake Color; CopingStone, Chesapeake Color; Custom Dublin™ Water Feature, Chesapeake Color; Column: Dublin™ Freestanding, Chesapeake Color

Singles

BrikStone
CHAMFERED

Versatile in color and application, BrikStone Chamfered has become the top choice of many designers. This single stone, featuring beveled edges, can create classic patterns such as basket weave, running bond and herringbone.

ABOVE: BrikStone Chamfered, James River Color; CopingStone, Richmond Color

BELOW: BrikStone Chamfered, James River Color and Sahara (Sahara is available by special order only)

LEFT: BrikStone Chamfered, James River Color

JAMES RIVER

JEFFERSON

CottageStone ANTIQUED

CottageStone Antiqued is available in 6" x 9". With the pavers' antiqued finish, your new hardscape will have the allure of timeworn stones.

ABOVE: CottageStone Antiqued 6" x 9", James River Color

LEFT: CottageStone Antiqued 6" x 6" & 6" x 9", Blue Ridge Color (6" x 6" available by special order only)

CottageStone
CHAMFERED

Modeled after brownstone, CottageStone Chamfered is crafted in 6" x 9" shapes. The beveled edges add dimension and maturity to your project and give it a Georgetown elegance.

ABOVE & LEFT: CottageStone Chamfered 6" x 9", James River Color; CottageStone Chamfered, Jefferson Color; HighlandStone® Freestanding Wall, Richmond Color; HighlandStone® XL™ Cap, Richmond Color

CottageStone
TEXTURED

Available in either a 6" x 6" square or a 6" x 9" rectangle, CottageStone Textured offers a multitude of hardscape pattern opportunities. With its dimpled-face finish, CottageStone Textured will make your final design convey craftsmanship and perfect imperfections.

Offered in two styles, our porcelain pieces are similar to indoor porcelain tiles, only thicker and more durable, providing a fabulous option for contemporary outdoor living spaces.

LEFT: Quarziti 2.0 Modular & Unico, Mountains Color (modular pattern and color special order)

Porcelain

Noon

Simple and versatile, Noon makes quite the impression, combining the warmth of natural wood with an elegant, glossy finish. See page 107 for information regarding shade variations.

ABOVE: Noon, Daylight Color

RIGHT: Noon, Daylight Color

V4-High Variation: Random color variation from piece to piece, so that one piece may have a totally different color from the other pavers. Thus, the final installation will be unique.

Quarziti 2.0

Characterized by a shading effect that recreates the authentic diversity of natural elements, Quarziti 2.0 is a great choice for all exteriors. Easy to clean and install, it is resistant to stains and breakage. See more information on page 107 regarding shade variations.

ABOVE: Quarziti 2.0, Waterfall Color

RIGHT: Quarziti 2.0, Waterfall Color

V3-Moderate Variation: Though the colors present in a single piece may indicate the color patterns to be expected on other tiles, the amount of colors on each piece might vary significantly.

Our multiple-piece designs offer a number of sets featuring pavers in different sizes. This allows for many different looks and patterns to add variety and visual appeal to your hardscape project.

Chatham Natural, James River Color; Border: CottageStone 6" x 9", Richmond Color; CopingStone, Richmond Color; CircleStone Textured, James River Color; Highland Stone® Freestanding, Richmond Color; Highland Stone® XL™ Cap, Richmond Color

Sets

Chatham

MINI

Chatham Mini (4pc), available in a Natural Finish, can be used separately for a driveway or can be combined with Chatham Natural and Chatham XL into a multi-piece slab look to create an elegant tile-like surface for patios, walkways and poolsides.

KingsLand ANTIQUED

KingsLand Antiqued feels as though it was laid by hand in another era. The three-piece modular system is intentionally aged around the edges to create a hardscape that appears to have withstood the test of time.

ABOVE: KingsLand Antiqued, Richmond Color (Special Order)

LEFT: KingsLand Antiqued, Blue Ridge Color; CottageStone Textured, Slate Color; Wall: Highland Stone® Freestanding, Blue Ridge Color; Dublin™ Freestanding, Chesapeake Color; Wall Cap: HighlandStone® XL™ Cap, Blue Ridge Color; Column: Dublin™ Freestanding, Chesapeake Color; Column Cap: 32" x 32" Flat Rock Face Cap, Gray Color; Custom Dublin™ Traditional Fireplace, Chesapeake Color

KingsLand TRADITIONAL

This three-piece modular system is ideal for high-traffic areas, yet maintains charm and warmth with its rounded edges. The pattern possibilities are endless, and designers will often contrast colors to create dynamic curb appeal.

RIGHT: CircleStone Textured, James River Color; Chatham Natural, James River Color; Highland Stone® Freestanding, Richmond Color; Highland Stone® XL™ Cap, Richmond Color

CircleStone TEXTURED

CircleStone Textured is a five-piece paver system that complements Eagle Bay's entire product line. Use it to provide intimate and unique focal areas for both large and small spaces.

Our permeable line will satisfy your design aesthetics while limiting your ecological footprint. These Eagle Bay pavers significantly filter contaminants and reduce runoff. We are proud to say this is a win-win for the homeowner and our natural landscape.

EcoBay II, James River Color

Permeables

EcoBay II

With their traditional shape, EcoBay II permeable pavers can fit nearly any design. Unlike traditional stone or pavers, this two-piece system will effectively reduce the amount of runoff that can pollute our streams, lakes and rivers.

ABOVE: EcoBay II, James River Color

RIGHT: EcoBay II, James River Color; CottageStone Textured, James River Color

TurfStone

TurfStone can be a visual feature in your hardscape or serve a more functional role. It has a honeycomb shape that can be filled with gravel or grass. This allows rainwater to filter through slowly and evenly, resulting in the remediation and stabilization of soil erosion.

Available only in Gray Color, as shown.

“I’ve seen a lot of beautiful projects on the Eagle Bay Instagram and Facebook feeds. So when it was time to begin our project, we already knew what products we liked. And when our installer recommended Eagle Bay as well, it was a done deal.” — BETH LONG

Eagle Bay walls add structure, protection and decoration to your hardscape. Our products are tested for strength and durability, and we have perfected a collection of color blends so you don't have to compromise on style. Columns and caps are available for each wall unit.

WALLS

Walls & Grill Station: Highland Stone® 3" (special order only) & 6" Freestanding & Retaining, Jefferson Color; Wall Cap: Highland Stone® XL™ Cap, Chesapeake Color; Pavers: Chatham Natural, Jefferson Color; CottageStone 6" x 9" Textured, Chesapeake Color; Steps: CopingStone, Chesapeake Color; Fire Features: Custom Highland Stone® Fire Pit, Jefferson Color; Fire Pit Cap: Highland Stone® XL™ Cap, Chesapeake Color; Dublin™ Traditional Fireplace, Chesapeake Color

Dublin™

FREESTANDING

Our Dublin™ Freestanding Wall System mimics centuries-old boundary walls found throughout Dublin, Ireland. These tumbled stones add charm to any hardscape project. The same single unit is used for the wall, column and caps, making estimation and assembly a snap.

CHESAPEAKE

JAMES RIVER

ABOVE: Custom Dublin™ Freestanding Fire Pit, Chesapeake Color

LEFT: Wall: Dublin™ Freestanding, Chesapeake Color

Highland Stone® FREESTANDING

Each piece of the Highland Stone® Freestanding Wall System features a rough finish, giving wall projects up to three feet high a secure and natural feel. Stones are available in a variety of widths (see pages 116-117).

ABOVE: Highland Stone® Freestanding Wall, Richmond Color; Highland Stone® XL™ Cap, Richmond Color
RIGHT: Sitting Wall: Highland Stone® Freestanding, Bull Run Color; Highland Stone® XL™ Cap, Bull Run Color

SteepleCrest

FREESTANDING

The SteepleCrest wall design is inspired by the warm, rustic aesthetic of a horse farm boundary wall. Similar to Dublin™ Freestanding, these tumbled stones add a historic charm to your hardscape project but offer three block sizes, providing a more natural look. SteepleCrest also offers a cap option that's perfect for adding a seating ledge.

SteepleCrest Freestanding, James River Color, SteepleCrest Cap, James River Color, Fire Pit, Custom SteepleCrest Freestanding, James River Color with Highland Stone® Fire Pit Ring Cap, Brown Color, KingStand Traditional, James River Color, CottageStone Textured, Richmond Color

Aspen Stone® RETAINING

Aspen Stone® retaining walls are lightweight and easy to handle, perfect for smaller spaces and patio or garden walls. The rough-hewn texture, available in two colors, is visible on one side and works for projects up to two feet high.

ABOVE: Aspen Stone® Retaining, James River Color; Aspen Stone® Cap (special order), James River Color
RIGHT: Aspen Stone® Retaining, James River Color; Aspen Stone® Cap (special order), James River Color

Diamond® 10DS

RETAINING

The Diamond® 10DS Retaining Wall System is the perfect choice when your project calls for classic, clean lines. It has a rear-lip locator that works exceptionally well for raised patios, walls, terraces and grades. Choose a straight edge or curved design with this flexible block.

LEFT: Diamond® 10DS Retaining, James River Color; Highland Stone® XL Cap, James River Color; Highland Stone® Freestanding & Retaining, James River Color; Wall Cap: CopingStone, Chesapeake Color; Custom Dublin™ Column, James River Color; 32" x 32" Flat Rock Face Cap, Grey Color; Custom Dublin™ Traditional Fireplace, James River Color; Custom Dublin™ Woodbox, James River & Chesapeake Color

ABOVE: Diamond® 10DS Retaining, Jefferson Color; CopingStone, Chesapeake Color

Diamond Pro STONE CUT® RETAINING

With their proven strength and a natural-stone appearance, the Diamond Pro Stone Cut® Retaining Wall System is the perfect choice for larger-scale projects.

DiamondPro Stone Cut®, James River Color; Highland Stone® XL™ Cap, Chesapeake Color; Stairs: CopingStone, Chesapeake Color; Patio: Chatham Natural, Richmond Color; Wall Cap: 32" x 32" Flat Rock Face Cap, Gray Color

Highland Stone® RETAINING

The Highland Stone® Wall System is Eagle Bay's most popular retaining wall for projects up to four feet high. The rough finish, visible on one side, blends into its surroundings. Use multiple widths to give a more natural feel (see pages 116-117).

ABOVE: Wall: Highland Stone® Retaining & Freestanding, Bull Run Color; Wall Cap: Highland Stone® XL™ Cap, Bull Run Color

LEFT: CottageStone Chamfered 6" x 9", James River Color; CottageStone Chamfered, Jefferson Color; Highland Stone® Freestanding & Retaining Wall, Richmond Color; Highland Stone® XL™ Cap, Richmond Color

Highland Stone[®]

XL[™] CAP

Our Highland Stone[®] XL[™] Wall Cap features a tapered shape, and both sides are rough-hewn for a natural look. This versatile piece is perfect for a wall cap, stair or sitting ledge, and it's available in seven colors.

Use custom paver light as an accent in your CottageStone border to add visual interest to your patio.

Penetrating Sealer

· Ideal for slip-prone surfaces · Stain guard – repels contaminants · For concrete pavers and natural stone · Enhances color of pavers
(1 GAL., 5 GAL.)

Care & Maintenance

ACCESSORIES

DRIBOND™ SYSTEM

DriBond™ is specially designed for the overlaying of pavers or natural stone over existing concrete.

DriBond™ is a polymer enhanced dry mud set. Once cured, Dribond™ veneers the paver to the concrete underneath at 6,850 PSI.

DriBond™ makes the installation of pavers possible for a fraction of the cost needed to tear out existing concrete and replace it with a traditional sand-set paver installation.

Simply screed Dribond™ out 3/8 of an inch thick using the Dribond™ screed tool, lay your pavers, wet set the border using Borderbond and finally water in the Dribond™ to activate.

(50 LB. BAG/56 BAGS PER PALLET)

BORDERBOND

BorderBond is a ready-to-use liquid fortifier that mixes with DriBond to bond border pavers firmly to the concrete base.

(1.56 GAL.)

BASE & EDGE RESTRAINTS

EZ BASE SYSTEM

EZ Base is a revolutionary new way to install interlocking pavers. These easy to install high-density foam panels replace the need for a traditional compacted aggregate layer base system. With EZ Base, you save time, labor and money by saving up to 8 inches of excavation.

(10 PER BUNDLE/12 BUNDLES PER PALLET)

ADHESIVES

STRUCTUREBOND™

StructureBond™ is an innovative super-strength foam adhesive that bonds a wide range of construction materials such as pavers, concrete, natural or synthetic stones, bricks, wood, plywood, composite materials, drywall, steel, aluminum, PVC, fiberglass and porcelain.

Never waste glue again! StructureBond™ is dispensed out on an easy to use gun; if you only use half a tube on a job, simply put it back into your truck and save it for the next job. One tube of StructureBond™ equals the amount of 5 tubes of normal adhesive. Its strength is unmatched, and the glue sets in only 8 minutes.

Wet block? No problem! A wet block will actually help StructureBond™ set up faster and stronger. No more waiting for a jobsite to dry before applying adhesive.

STRUCTUREBOND™ GUN

- Allows for precise adhesive delivery.
- Application time up to 50% faster than conventional tube adhesive.

RG+ CONCRETE ADHESIVE

Ultra adherent on dry, wet or frozen surfaces
(10 FL OZ., 28 FL OZ.)

SNAP EDGE

(8 FT./PC., 24 PC./BUNDLE, 28 BUN./PALLET)

Chatham Natural & XL, Jefferson Color; Dublin™ Traditional Fireplace Kit, Chesapeake Color; Cottage Stone 6" x 9" Textured, Chesapeake Color

Pulling all the pieces together for your hardscape project can be intimidating. Wondering where to start? In this section, we provide additional information that will get you closer to your dream design: colors, measurements, patterns and more.

RESOURCES

PAVER COLORS

COREVISION™ COLORS

The colors below are made with a “through and through” color process that provides natural and consistent tones throughout the stone.

CHATHAM MODERN COREVISION™ COLORS

The colors below are made with a “through and through” color process that provides natural and consistent tones throughout the stone.

PERMAVISION™ COLORS

The colors below are made with a vibrant layer that ensures lasting color, minimizes stone particles and provides a smoother stone surface.

FOR THE MOST ACCURATE COLOR REPRESENTATION, VISIT YOUR LOCAL EAGLE BAY DEALER TO REQUEST A SAMPLE PAVER.

Eagle Bay has attempted to represent our colors as accurately as possible; however, variances will naturally occur as a result of the printing and manufacturing processes. In all situations, we recommend viewing the actual product before choosing a color and ordering.

PORCELAIN COLORS

WOOD FINISH COLORS

STONE FINISH COLORS

FOR THE MOST ACCURATE COLOR REPRESENTATION, VISIT YOUR LOCAL EAGLE BAY DEALER TO REQUEST A SAMPLE.

Eagle Bay has attempted to represent our colors as accurately as possible; however, variances will naturally occur as a result of the printing and manufacturing processes. In all situations, we recommend viewing the actual product before choosing a color and ordering.

To make sure that you get the look you are after, find out how much color shade variation the pavers have before you make your purchase. As the color and details of our porcelain pavers may vary from piece to piece and from run to run it is recommended to work from multiple boxes/pallets of pavers to achieve a favorable mix with an even distribution of the inherent colors.

BENEFITS AND CONSIDERATIONS OF PORCELAIN

STYLISH

Porcelain takes available style options to a new level

MODULAR

For faster installation, simply lay as you go

DURABLE AND EASY TO CLEAN

Resistant to freeze thaw

Freeze thaw resistant—100% frost-free and properties remain unaltered at temperatures from -51.1° to +60° C (-60°F to +140°F).

Resistant to breakage

Because every slab can withstand loads of over 2200 lbs.

Resistant to chemicals

Because our pavers are unaffected by alkalis, acids, chemical agents, salt and other de-icing materials.

Resistant to stains

Because a high density and ultra-low absorption rate creates a tight paver surface, it fends off surface mold, moss, dirt and other types of stains.

EASIER FOR YOU!

To lay

Because of superior accuracy in dimensional sizing and linear sides, the pavers allow for perfectly executed installations with tight and accurate lines.

To clean

Because it can be cleaned with normal household cleaners and even pressure washed with a low pressure washing device.*

To remove

Because a 24" x 24" slab weighs just 37 lbs., its light weight permits easy removal, serviceability and even reusability. (Excluding adhered installations).

To avoid falls

Because the structured top textures formed on the surface of our pavers create non-slip surfaces.

* It is important that all pressure washing of your porcelain pavers be done with a low pressure washer with a maximum of 1600 psi and nothing more powerful. When pressure washing your installation, care should be taken to prevent damage to the grout (adhesive and grout installations) and some re-sanding will be necessary when power washing an installation with sand or polymeric sand joints.

SHADE VARIATIONS

V1-Uniform Appearance: Minimal to no difference among pieces.

V2-Slight Variation: Distinguishable differences in texture and/or pattern within similar colors.

V3-Moderate Variation: Though the colors present in a single piece may indicate the color patterns to be expected on other tiles, the amount of colors on each piece might vary significantly.

V4-High Variation: Random color variation from piece to piece, so that one paver may have a totally different color from the other pavers. Thus, the final installation will be unique.

SRI — SOLAR REFLECTIVE INDEX (SRI)

SRI is a composite measure or indication of how well a surface emits absorbed heat. Since solar heat represents approximately 47% of the sun's energy at the earth's surface, it is an important consideration when selecting paver colors.

Desired SRI ratings are in accordance with the most recent LEED requirements. SRI results are subject to the specific mix designs of each manufacturer, contact the local sales representative for results on specific colors.

WALL COLORS

Eagle Bay wall colors are designed to blend in nicely with your surrounding landscape and complement the paver collections featured in this catalog.

FOR THE MOST ACCURATE COLOR REPRESENTATION, VISIT YOUR LOCAL EAGLE BAY DEALER TO REQUEST A SAMPLE.

Eagle Bay has attempted to represent our colors as accurately as possible; however, variances will naturally occur as a result of the printing and manufacturing processes. In all situations, we recommend viewing the actual product before choosing a color and ordering.

UNDERSTANDING THE DIFFERENCES AMONG PAVER FINISH TYPES AND EDGE TYPES

Although cost, durability and maintenance are all important factors in choosing a material for your project, we think you'll agree that the design choices are the most exciting thing about Eagle Bay concrete pavers. Within our paver collections, we offer several finishes to help you get the exact look you desire.

FINISH STRONG

You'll want to start by choosing the overall look you want for your hardscape project. Our pavers are manufactured to resemble many other materials such as brick, cobblestone, natural stone, flagstone, slate and concrete (with added sustainability, maintenance and cost benefits). We believe details matter, so we have developed

manufacturing processes that give our pavers a number of different textures to re-create natural weathering. Currently, we offer five distinct paver finishes: Antiqued, Chamfered, Traditional, Cobbled and Textured. Each finish features its own combination of surface and edge styles designed to create a specific look and feel.

SURFACE FINISHES

EDGE FINISHES

CHAMFERED
Flat surface, beveled edges

TRADITIONAL
Flat surface, rounded edges

TEXTURED
Dimpled surface, rounded edges

ANTIQUED
Flat surface, worn edges

COBBLED
Mottled surface, worn edges

HOW TO INSTALL A PATIO USING PAVERS

If you want to expand your indoor rooms to the great outdoors, where you can enjoy space to dine, entertain or just relax, consider installing a patio. Anyone can install a patio, but because lifting, hauling, digging and cutting are involved, it is important to wear work gloves, knee pads, a back support belt, safety glasses and ear plugs, as well as to practice proper lifting techniques.

DESIGNING AND INSTALLING YOUR OWN PATIO CAN BE COMPLETED IN SEVEN STEPS:

PAVER SELECTION AND PROJECT ESTIMATION

1. Determine the area to be paved and how much material will be needed. Choose paver shape and pattern. Estimate quantity of pavers needed for paved area.

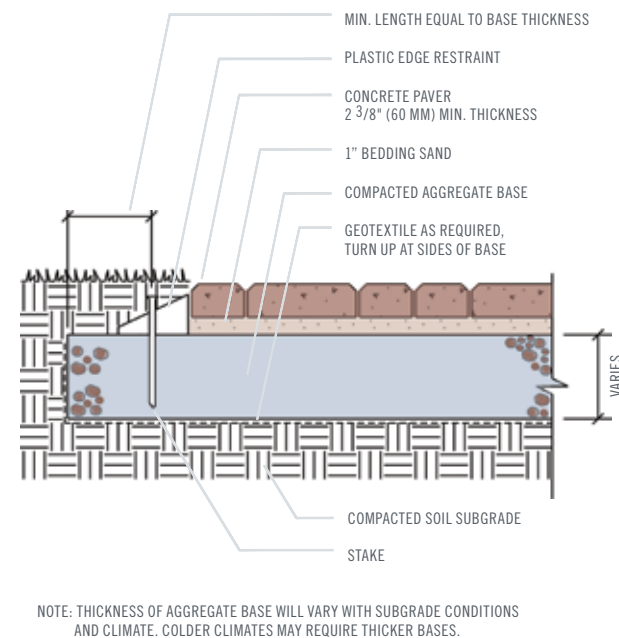

SITE ANALYSIS AND PREPARATION

2. Have utilities marked and excavate area to be paved. The heavier the surface load, the deeper the base excavation. Be sure you have plans for relocating the soil and sod. Compact exposed base area.
3. Install geotextile and base aggregates. Turn cloth up at sides of base. Place aggregates over cloth to required depth and compact to 95% solid. Set posts and stringlines for final base grades and finished paver elevations.

LAYOUT AND INSTALLATION

4. Install C-33 concrete bedding sand at a depth of 1"– and screed smooth to set pavers to finished elevation.
5. Place pavers on screeded sand bed. Use stringlines to keep pattern straight. Set hand-tight joints. Cut pavers in areas as needed to complete pattern.
6. Set plastic edging tight against all exposed paver edges and spike firmly every 24" for walkways and 12" for driveways and curves. Edging works best if set on an aggregate base after trimming sand, setting bed flush with outside edge of pavers.

7. Make one pass over entire area with a plate compactor, sweep dry C-33 concrete sand or other selected joint material into all joints, and compact again to complete interlock process. Refill to desired level after early weathering. Sweep up, clean up and enjoy your new paver installation.

NOTE: Eagle Bay pavers with dimpled or textured surfaces—EpicStone, GrandCay, CircleStone, SF Rima™, CottageStone, and Essex™ Stone—have high and low points on the surface, which lend a more natural aesthetic appeal to the pavers. However, pavers with textured surfaces are susceptible to surface scuffing when compacted in place with plate compactors. Therefore, these paver types should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the Eagle Bay pavers. This system will help to ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet, Mirafi 500X, or cardboard. Manufacturers of plate compactors are able to recommend other products that can be used for this purpose. For further information on interlocking concrete paver details, technical information, and recommended construction practices, visit the ICPI (Interlocking Concrete Pavement Institute) at www.icpi.org.

Efflorescence is a whitish, powder-like deposit that can appear on the surface of concrete pavers. When cement hydrates, a significant amount of calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide in the air to form water-insoluble calcium carbonate, called efflorescence. Efflorescence does not affect the structural performance or durability of concrete pavers. Eagle Bay includes admixtures in its concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. Eagle Bay does not warrant concrete pavers that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months of installation. It may remain for months or wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence removers. Before purchasing or applying any chemicals to remove deposits, please consult with a chemical company that specializes in efflorescence-removal chemicals.

GUIDELINES FOR USING DEICING CHEMICALS ON UNIT PAVERS: The following guidelines can help limit the exposure of deicing chemicals while maintaining a safe environment:

- Limit the use of deicing chemicals by combining them with a traction aid, such as sand.
- Do not over apply deicing chemicals; follow the recommended dosages.
- Do not use deicing chemicals in place of snow removal; reserve them for melting ice formed by freezing precipitation or freezing snow melt.
- When using magnesium-based deicing chemicals, ensure that the pavement is thoroughly washed in the spring as these deicers will continue to chemically degrade all types of concrete pavement throughout the year.
- Protect vegetation and metal from contact with deicing chemicals, as most can impair vegetation and corrode metals.

In addition, use ICPI-recommended sand jointing materials to minimize water penetration into the pavers. This will also help keep salts from entering and accumulating in the jointing and bedding sand, which can eventually degrade the pavers. The ICPI also recommends adequate pavement slopes (typically a minimum of 2%) to facilitate surface-water drainage and to help remove deicing materials. Although not essential, reduction of water entering jointing sand can be further enhanced with joint-sand stabilization materials and sealers.

HOW TO INSTALL A RETAINING WALL

QUICK COURSE ON COURSES

To complete your project, you will need the following hand tools: shovel, tape measure, hammer, chisel, carpenter's level, stakes, string line, garden hose, safety glasses, gloves, pencil and square. You may also need a skid loader, compactor, wheelbarrow and a circular cut-off saw with a masonry blade. Other materials include a 4" diameter flexible polypropylene pipe (drain tile), a supply of sand and gravel (3/4" or smaller aggregate with fines) for the base and gravel (3/4" free-draining aggregate without fines) to use as backfill.

NOTE: Efflorescence is a whitish, powder-like deposit that can appear on the surface of concrete pavers. When cement hydrates, a significant amount of calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide in the air to form water-insoluble calcium carbonate, called efflorescence. Efflorescence does not affect the structural performance or durability of concrete pavers. Eagle Bay includes admixtures in its concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. Eagle Bay does not warrant concrete pavers that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months of installation. It may remain for months or wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence removers. Before purchasing or applying any chemicals to remove deposits, please consult with a chemical company that specializes in efflorescence-removal chemicals.

DIRECTIONS:

1. Using a shovel or a skid loader, dig a trench about 24" wide and deep enough to fit the required amount of buried block and compacted base. For walls up to 4' high, bury one layer of units. For walls taller than 4', consult a qualified engineer for design information. Total wall height includes the height of any buried layers.
2. Firmly compact the soil in the bottom of the trench. Lay 6" of compactible base (sand and gravel) in the bottom of the trench and compact (Fig. A).
3. Place the first layer of Anchor™ units without lips on the prepared base (lips must be manually knocked off units before placement) (Fig. B). Position the units side by side in full contact with the base. Level in both directions using your carpenter's level to level front to back and side to side.
4. Continue assembling additional layers by placing units in a staggered relationship to the layer beneath (running bond), pulling each unit forward until secure (Fig. C). NOTE: Use gravel (free-draining aggregate) to backfill each additional course as it is installed.
5. Place drain tile behind the wall at grade to allow water to drain from the backfill (Fig. D). Outlet the drain tile through the wall at every low point, or every 50' of wall length, and around the ends of the wall. Backfill with free-draining gravel 12" behind the wall. Fill in the voids. Organic soil or clay-type soil is not recommended for backfill material.
6. Fill any remaining areas behind the wall with soil (Fig. E). Compact every 8"—Repeat steps 4, 5, and 6 until the wall reaches the desired height. For walls taller than 4', consult a qualified engineer for information concerning proper design, backfill and geosynthetic reinforcement.
7. Firmly compact native soil behind the wall (Fig. F). Do not compact directly on top of the units.
8. You may need partial blocks. To split a block, use a hammer and chisel to score the block on all sides. Pound the chisel on the score line until the block splits. If the block does not split easily, you may need to use a circular cut-off saw with a masonry blade. Read and understand the operating manual before using a saw. Always wear eye protection when splitting blocks.

Refer to the Estimating and Installation Manual for instructions on installing freestanding walls and special applications. Copies are available at authorized Eagle Bay Dealers.

HOW TO INSTALL CIRCLESTONE

CircleStone is a great solution to add a focal point to a patio or driveway. Because there is lifting, hauling, digging and cutting involved, it is important to wear work gloves, knee pads, a back support belt, safety glasses and ear plugs, as well as to practice proper lifting techniques.

CIRCLESTONE KIT CONTAINS JUST FIVE DIFFERENT SHAPES FOR EASY INSTALLATION

1. Each Circle Kit makes one 9.35' diameter circle
2. Kit cannot be divided to make multiple smaller circles
3. Due to the production process, there will be extra stones left
4. Pieces included in the kit are as follows:

9.35' DIAMETER

- CIRCLE 0:**
2 half Center Stones
- CIRCLE 1:**
8 small Circle Stones
- CIRCLE 2:**
8 small Circle Stones

*Gaps may appear. Distribute evenly over entire radius before filling with sand.

**Small rectangle included. Can be used on outer ring.

5. To make a larger circle, expand by using CottageStone 6" x 6" pavers

The following chart is a more detailed look at what is needed to increase the scale of your design when using the CottageStone 6" x 6" pieces.

RADIUS IN FEET	DIAMETER IN FEET	CIRCUMFERENCE IN FEET	6 X 6 PIECES	PIECE PER EXTENSION
5.175	10.35	32.5155	66	66
5.675	11.35	35.6571	138	72
6.175	12.35	38.7987	216	78
6.675	13.35	41.9403	300	84
7.175	14.35	45.0816	390 ea. (420/cube)	90
7.675	15.35	48.2234	488	98
8.175	16.35	51.365	592	104
8.675	17.35	54.5066	702	110
9.175	18.35	57.6482	818 ea. (840/2 cubes)	116

Some 6" x 6" pieces may need to be cut to make a tighter fit.

PERMEABLE PAVER BENEFITS & HOW THEY WORK

BUILDING A GREEN INFRASTRUCTURE: THE BENEFITS OF USING EAGLE BAY PERMEABLE PAVERS

1. Eagle Bay® PICP Systems accommodate a wide variety of stormwater management objectives due to flexibility of pavement design, storage quantity capacities and water quality treatment.
2. Runoff reduction of up to 100%, depending on project design parameters.
3. Provides both channel protection and flood mitigation.
4. Maximizes groundwater recharge with improved water quality.
5. Allows for retention and storage of stormwater for possible reuse for irrigation or other non-potable applications.
6. Reduces non-point-source pollutants in stormwater, thereby mitigating impact on surrounding surface waters, and may lessen or eliminate downstream flooding and stream bank erosion.
7. Minimizes impact and stress on existing stormwater or combined stormwater and sewer systems through reduced peak discharges.
8. The multi-purpose Permeable Pavement enhances land-use planning and leads to more efficient use of available land for greater economic value, especially in high-density urban areas. Utilizing the storage capacity of the PICP System below the pavement-wearing surface, as opposed to above ground storage ponds or the deep excavation required by below-grade confined space systems, accomplishes this goal.
9. May decrease project cost by reducing or eliminating drainage and retention/detention systems.
10. May reduce cost of compliance with stormwater regulatory requirements and lower municipal or state utility/stormwater fees.
11. Solar Reflectivity Index compliance will reduce heat island effect and thermal loading of surrounding surface and/or outflow waters when Eagle Bay's SRI-compliant colors are specified.
12. Accommodates pavement design to provide both mechanical stability and structural integrity for a variety of traffic loads, including secondary roadways—light and heavy duty traffic requirements.

OPTIONAL PERFORATED UNDERDRAIN

SOIL SUBGRADE—ZERO SLOPE

CURB/EDGE RESTRAINT WITH CUTOUTS FOR OVERFLOW DRAINAGE

HOW TO INSTALL A DUBLIN™ FIRE PIT KIT

Our easy to install Dublin™ fire pit kit is a simple way to add warmth and a cozy atmosphere to your patio or backyard.

Just about anyone can install the Dublin™ Fire Pit Kit, but because there is lifting, hauling, digging and cutting involved, it is important to wear work gloves, knee pads, a back support belt, safety glasses and ear plugs, as well as to practice proper lifting techniques.

SURFACE PREPARATION

Dig an area that extends 4 inches wider than the fire pit, and 2 inches below the surface. Add gravel and compact the surface until it is level and flush with the ground. If you are setting the fire pit on pavers, place directly onto the surface and add 2-3 inches of sand to allow for proper drainage.

ROUND FIRE PIT KIT INSTALLATION

Place 16 blocks in a circle and repeat for all 5 layers, making sure each layer is staggered so the joints don't line up.

SQUARE FIRE PIT KIT INSTALLATION

STEP 1: LAY TIER 1

Using the diagram below, lay out 16 blocks in a rectangular design so that the inside diameter is 56" x 56". Make sure that this is level and brush the top of the block. For extra stability, apply a small bead of concrete adhesive to this tier and to every subsequent tier hereafter.

STEP 2: LAY TIERS 2 & 3

Reverse the Tier 1 pattern and lay Tier 2 using 16 blocks (add adhesive if desired). Repeat this step for Tier 3 (add adhesive if desired). The tier reversal is done to offset the joints, thus giving a better look to your fire pit.

STEP 3: CAPPING

Place 24 blocks perpendicular to the other tiers. This creates the cap for the fire pit. Start on one corner and place 6 blocks. Turn the block 90 degrees and place 6 more. Continue for the remaining two sides. Remove each cap one by one, apply adhesive to the top of Tier 3, and reset the cap. Continue doing so until you have glued all of the cap block in place.

NOTE: Even if the previous tiers were not glued, Eagle Bay highly recommends gluing the caps to keep them in place.

HOW TO INSTALL A HIGHLAND STONE® FIRE PIT KIT

1. FOUNDATION

RECOMMENDED BY EAGLE BAY — COMPACTED GRAVEL BASE: Place and uniformly compact the gravel base (crushed stone no larger than 3/4"). Dense-graded aggregate base should be compacted using a vibratory plate compactor or hand tamper. A 4" thick gravel base is recommended and should extend beyond the Highland Stone® Fire Pit a minimum of 3" on each side. The top of the leveling pad should be at least 3" below grade.

CONCRETE BASE OR CONCRETE PAVERS: Place Highland Stone® Fire Pit directly on a concrete base or concrete pavers. (Eagle Bay recommends a compacted gravel base). Make sure to fill the bottom of the fire pit with a layer of sand (3" minimum) to ensure proper drainage.

INSTALLING FIRST LAYER OF BLOCK: (A) Use a center stake and lay out the Highland Stone® in roughly a 22.5" radius from center stake to the back of the block. A circle with roughly a 45" inside diameter will require 10 medium and 12 small units. **(B)** It is important to ensure that each small unit has a corresponding small unit directly across from it (180 degrees) in order to attain the proper radius. Slight adjustment to the circle of blocks may be required for proper alignment.

2. BUILDING ADDITIONAL LAYERS OF BLOCK

Make sure the first layer of block is perfectly leveled before building additional layers. Using concrete-safe adhesive, glue the second row of blocks to the first row. It is important to stagger the joints as much as possible on every course. Make sure not to line up any two small units on top of the small units below. There are enough units to build 7 layers of block, which would make the fire pit roughly 21" tall plus coping.

**For packaging, two extra of each unit are provided in the kit.

3. INSTALLATION OF WEATHERED CAP & OPTIONAL METAL FIRE RING

Once the fire pit is at the desired height, use a concrete adhesive to secure the four radius cap units. Add crushed stone or lava rock to raise the fire bed up to your preferred height. If you choose the optional metal fire ring, please insert before capping the fire pit.

Safety Tips:

- The fire pit is for outdoor use only.
- Make sure to assemble the fire pit away from surrounding structures and make sure nothing that is a potential fire or injury hazard is directly above the fire pit.
- Before beginning installation, please contact your municipality to obtain information for fire pit installation regulations. It is very important to check local codes.

View more installation details, along with time-lapse video, on our website: eaglebaypavers.com.

PATTERNS

Patterns are intended as guides for preliminary pattern design only. It is the designer's or contractor's responsibility to verify and calculate the unit sizes and package quantities necessary to successfully execute the installation.

KINGSLAND, EPICSTONE, GRANDCAY & CHATHAM

There are no set patterns for these paver families. Some Eagle Bay customers have created patios by randomly picking and setting the stones in no particular order as they come off the cube. This can achieve a nice, natural look. However, even piece distribution is not possible when randomly selecting pavers, since selection is not based on a set pattern.

THE EAGLE BAY LIFETIME TRANSFERABLE WARRANTY

We stand behind our products with a lifetime product warranty.

Eagle Bay is proud to certify that our paving stones and retaining walls meet the latest industry standards in the United States. All Eagle Bay hardscape products comply with and surpass all applicable standards set by the ASTM C936 (American Society for Testing and Materials) and NCMA (National Concrete Masonry Association).

Eagle Bay offers a transferable lifetime warranty on the structural integrity of all paving stones and retaining wall units it manufactures. It covers any

disintegration and/or decomposition of the above-mentioned products resulting from natural causes and the abnormal deterioration of the surface due to the use of sodium chloride (NaCl), such as deicing salt. If products prove defective, we will replace those units. Eagle Bay's responsibility is limited to its manufactured products only and not to costs related to the installation of those products. We will honor this transferable warranty with a proof of purchase (i.e., invoice or delivery slip).

PRINTED COLOR SWATCHES The natural materials that we use in our paving stones and retaining wall products deliver a range of colors that closely match color samples in catalogs, spec books, color swatch books, and online photos. However, Eagle Bay cannot guarantee specific color matching. Our pavers and walls can vary slightly in color batch depending on environmental conditions. Therefore, colors shown are approximate representations of standard colors and shouldn't be expected to be an exact match. Final color selection should be made at your local dealer from stock product. Eagle Bay always recommends immediately verifying the product and color upon receipt. If there are any discrepancies, contact your local dealer before continuing your project. Installation of the product constitutes its acceptance.

are susceptible to surface scuffing when being compacted in place with plate compactors. Therefore, these paver types should always be compacted with plate compactors that incorporate a protective mat or other medium between the plate compactor and the surface of the Eagle Bay pavers. This system will help to ensure that paver surface scuffing is kept to a minimum. These protective mediums include: rubber matting, thin carpet, Mirafi 500X, or cardboard. Manufacturers of plate compactors are able to recommend other products that can be used for this purpose. For further information on interlocking concrete paver details, technical information, and recommended construction practices, visit the ICPI (Interlocking Concrete Pavement Institute) at www.icpi.org.

Also, snow removal equipment should have the proper spacing, bumpers, and rubber blade guards to protect the surface of the pavers. Eagle Bay will not be held responsible for damage to pavers caused by the misuse of compaction or snow removal equipment, leaving scuff marks, or burns on pavers.

EFFLORESCENCE Efflorescence is a whitish, powder-like deposit that can appear on the surface of concrete pavers. When cement hydrates, a significant amount of calcium hydroxide is formed. A reaction occurs between the calcium hydroxide and carbon dioxide in the air to form water-insoluble calcium carbonate, called efflorescence. Efflorescence does not affect the structural performance or durability of concrete pavers. Eagle Bay includes admixtures in its concrete pavers to help minimize efflorescence, but efflorescence is a natural occurrence in all concrete products. Eagle Bay does not warrant concrete pavers that it manufactures against the appearance of efflorescence. Efflorescence may appear immediately or within months of installation. It may remain for months or wear away. Deposits may be removed from the concrete paver surface by using proprietary efflorescence removers. Before purchasing or applying any chemicals to remove deposits, please consult with a chemical company that specializes in efflorescence-removal chemicals.

NOTE: This warranty does not apply to any breakage, chipping, or other deterioration caused by improper design or installation that does not comply with applicable codes, the ICPI (Interlocking Concrete Pavement Institute), NCMA (National Concrete Masonry Association), and recognized work procedures. Please visit www.icpi.org or www.ncma.org for more information on installation specifications. This warranty does not apply to any damage resulting from a natural disaster or from a deliberate and/or negligible act on the part of the purchaser, owner of the building, installer, or any third party.

COMPACTOR AND SNOW REMOVAL Eagle Bay pavers with dimpled or textured surfaces—EpicStone, GrandCay, CircleStone, SF Rima™, CottageStone, and EssexStone—have high and low points on the surface that lend a more natural aesthetic appeal to the pavers. However, pavers with textured surfaces
